

# 1- WHY A FEDERALIST PARTY?

Over the past decades the world has dramatically changed. **New global powers** have come to the fore, **new challenges** such as energy security and climate change have arisen, and the financial crisis has hit Europe and the world. In this context, **the ability of any single European country to satisfy the needs of its citizens has been constantly diminishing.** To generate growth and jobs or provide satisfactory levels of education and welfare has become increasingly difficult and costly. Only a true European solution can provide an answer to these challenges!

If the 19th century is the century that saw the emergence of nation states, today's world is increasingly shaped by continental-size states. In this new world order, only a united Europe will be able to tackle the above challenges, and grow stronger out of the crisis. To act in this direction has become urgent. It is for these reasons that the European Federalist Party fights for the creation of a Federal Europe: we believe it is only by uniting the strengths of our continent that Europeans will be able to keep having a say in international affairs, to find a new path towards economic growth and, ultimately, to maintain and improve our quality of life.

The Europe that we want is fully **democratic**, a Europe based on the principle of **subsidiarity** where local needs and interests are accounted for, and a Europe that is able to have a vision for the future - a vision for the coming generations of Europeans! It is our duty to give them hope, and to show them that the future can be in Europe, once again!

"If Europe were a State, it would be a major world power"

#### 2- WHAT WE WANT

The federal programme that the European Federalist party will defend ahead of the next European elections has been drafted through a cooperative effort involving all members from our sections throughout Europe and was adopted at our 3<sup>rd</sup> European Convention which took place in Brussels in November 2013. The full text of the programme may be accessed at <a href="http://federalistparty.eu/our-positions/our-political-programme/">http://federalistparty.eu/our-positions/our-political-programme/</a>. Some of the key points that we defend are:

- 1. The European Federation shall have **one President elected** directly by the European citizens or indirectly through the European Parliament, one elected **Senate** representing the Member States and a European Parliament with the **right of legislative initiative**. Europeans should be able to vote for **transnational lists**.
- 2. Europe shall have a federal budget financed through its own resources. These shall include Eurobonds to finance strategic infrastructures and investments in key sectors. At the federal level, a more effective and partially harmonised taxation system to finance federal expenditure will enable economies of scale and reduce the overall tax burden on each European citizen and on small and medium enterprises.
- 3. The European Federation shall be competent on issues such as **foreign and defence policy**, **asylum policy** and the control of the **external borders**. The Federal State shall have **a single seat at the United Nation Security Council** representing all Europeans.
- 4. The Federal State shall be able to support European businesses operating in Europe and abroad with an effective **industrial policy** able to drive Europe out of the economic crisis. Key **Europe-wide infrastructure** networks in the fields of energy and transport shall be further developed in order to lower the prices of energy, improve territorial cohesion in Europe, reinforce the single market and improve labour and student mobility.
- 5. The Federal State shall protect the sustainability of the European social model and ensure that its citizens benefit from comparable civil, political, and economic rights (including a European minimum socio-economic standard and a complementary European welfare system). A federal police shall be put in place and the role of the European Court of Justice shall be reinforced as the heart of the federal judicial system.
- 6. The Federation shall be initiated starting from the creation of a federal core composed of EU Member States willing to make a step further in the process of European Integration. The Federal State will have a common currency and monetary policy for all of its member states.
- 7. Today the cost of non-Europe is huge: the multiplication of ineffective national measures and policies was estimated by the European Parliament Research Office in least € 800 billion a year (e.g. 28 armies, 28 embassies, lack of integration in the field of energy, lack of a European industrial policy, etc.). This budget could be used for ambitious policies instead of forcing our citizens to accept austerity measures! If we decided to distribute this amount to the European people, this would correspond to 200 Euros a month for each European voter!

#### 3- WHO WE ARE

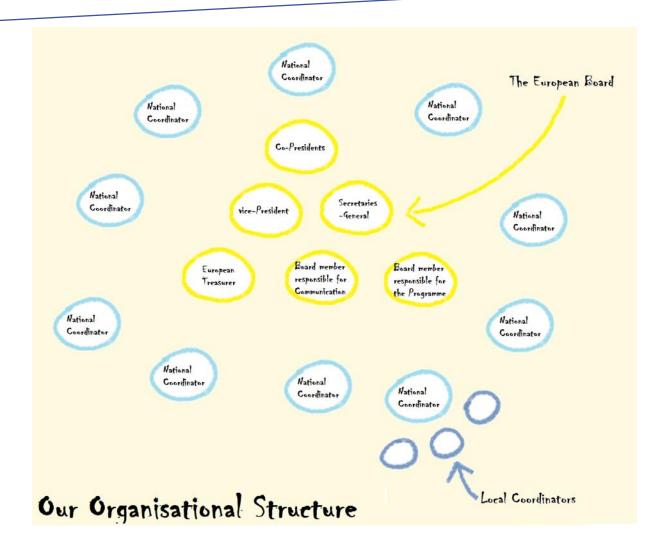

The European Federalist Party is the only **grassroots** and **pan-European** political party which advocates the creation of **a fully democratic and federal Europe** as the only possible solution to tackle today's and tomorrow's challenges!

The EFP has national and regional sections in Austria, Belgium, France, Germany, Greece, Hungary, Italy, the Netherlands, Poland, Portugal, Romania, Scandinavia, Spain, and the UK as well as in Asia.

At the next European Elections we will have **candidates in 6 European countries**, notably in Austria, Belgium, France, Greece, Italy and Portugal.
